(54) PRINT PROCESSING SYSTEM

(57)Abstract:

PURPOSE: To execute high-level print processing without changing a program on the side of a client machine in the print processing system for printing out a document by issuing a print request from the client machine to a print server.

CONSTITUTION: When a job reception part 33 receives the print request from the client machine, the attribute designated by the print request is interpreted, a header information part describing the designated attribute is added to a print job and delivered to a job control part 37. At the job control part 37, the header information part added to the delivered job is extracted, the attribute described there is interpreted and according to the designated attribute, print processing is executed by a job processing part 38.
